

Arthritis Pain Tracker

A joint-specific record for stiffness, swelling, warmth, mobility loss, and the daily drag of arthritis.

Routing Note

Need: Arthritis is not just pain. It is stiffness, swelling, heat, slowness, and the quiet loss of joint confidence.

Tool: Use it when you need a joint-specific record that shows morning stiffness, distribution, swelling, and functional drag.

Rule: Small joint details matter. They explain daily limitation better than a single pain score ever will.

Name: _____

Date Range: _____

Pain Scale Reference (0–10 NRS)

Joint Stiffness and Pain Record

Track morning stiffness in minutes and name the joints that joined the fight. Note swelling (S) and warmth (W).

Date	AM Stiffness (min)	Pain (0-10)	Joints Affected	Swelling?	Warmth?	Function

Joint-by-Joint Load

Rate pain 0–10 for each joint that mattered that day. Leave blanks where the joint stayed quiet.

Date	Hands	Wrists	Elbows	Shoulders	Knees	Ankles	Feet

Date	Hands	Wrists	Elbows	Shoulders	Knees	Ankles	Feet

What the Joints Cost

Date	Grip Strength	Stairs	Buttons/Zippers	Jar Opening	Walking	Writing

Medication response and joint notes
