

Chronic Back Pain Diary

A spine-pattern record for position, load, radiation, posture, and the mechanics that keep setting pain off.

Routing Note

Need: Back pain is mechanical, positional, repetitive, and often badly remembered after the fact. This sheet catches the mechanics.

Tool: Use it when sitting, bending, lifting, standing, driving, or posture are central to what keeps setting the pain off.

Rule: Track the trigger position and the recovery position. That contrast tells the story.

Name: _____

Date Range: _____

Pain Scale Reference (0–10 NRS)

Spine Pattern Log

Location: C=Cervical (neck), T=Thoracic (mid), L=Lumbar (low), S=Sacral. Note radiation when the pain starts traveling.

Date	Pain (0-10)	Location	Radiating?	Stiffness	Activity	Posture Issues	Treatment

Position and Load Fallout

Date	Sitting	Standing	Walking	Bending	Lifting	Lying Down	Driving

Date	Sitting	Standing	Walking	Bending	Lifting	Lying Down	Driving

Physio, movement, and recovery notes
