

Nerve Pain Symptom Log

A nerve-pattern log for burning, shocks, numbness, tingling, and the sensory detail clinicians actually use.

Routing Note
Need: Nerve pain has a different grammar. Burning, shocks, numbness, tingling, strange touch, sudden bolts. This sheet keeps that language intact.
Tool: Use it when the type of sensation matters as much as the intensity and you need the record to reflect that.
Rule: Name the sensation cleanly. Quality is evidence.

Name: _____
Date Range: _____

Pain Scale Reference (0–10 NRS)

Nerve Signal Record

Track the nerve-specific signal: B=Burning, T=Tingling, N=Numbness, S=Shooting, E=Electric shock. Keep the sensation language intact.

Date	Pain (0-10)	Type (B/T/N/S/E)	Location	Duration	Trigger	Medication	Relief

Sensory Loss and Distortion

Date	Numbness Areas	Tingling Areas	Weakness	Balance	Temperature Sens.	Touch Sens.

Date	Numbness Areas	Tingling Areas	Weakness	Balance	Temperature Sens.	Touch Sens.
