

WorkSafeBC Pain Journal Template

A work-injury record for pain, duties, function, treatment compliance, and return-to-work friction inside a BC claim.

Routing Note

Need: Work injury documentation lives on specifics. Task, time, limit, fallout. This sheet is built for that discipline.
Tool: Use it to connect symptoms, job duties, treatment compliance, and return-to-work barriers in one readable chain.
Rule: Could stand 12 minutes before pain climbed is stronger than standing was hard.

Claim Information

Worker Name: _____
WCB Claim Number: _____
Injury Date: _____
Employer: _____
Job Title: _____
Primary Work Duties: _____
Injury Description: _____

Affected Body Areas: _____
Treating Physician: _____
Physiotherapist: _____
Case Manager Name: _____

Pain Scale Reference (0–10 NRS)

Important: Keep the Work Connection Visible

Every entry should tie symptoms to the injury and to the actual task load. The claim gets weaker when that chain disappears.
Example: "L4-L5 pain climbed after 90 minutes seated. Could not finish afternoon data-entry block."

Daily Work-Related Pain Log — Week of: _____

Complete one row per day. Keep the chain intact: symptom, duty, limit, fallout. Note work status: F = Full duties, M = Modified, O = Off work.

Day	Date	AM Pain	PM Pain	Eve Pain	Work Status (F/M/O)	Specific Duties Affected	Aggravating Activities
Mon							
Tue							
Wed							
Thu							
Fri							
Sat							
Sun							

Daily Functional Limitations (Work-Related)

Be specific and measurable. A time limit, lifting limit, or failed task is stronger than a general complaint and easier to defend in a modified-duty discussion.

Day	Sitting (min before pain)	Standing (min before pain)	Lifting Capacity (lbs)	Walking (min before pain)	Driving (min)	Job Tasks Unable to Complete
Mon						
Tue						
Wed						
Thu						
Fri						
Sat						
Sun						

Work Connection Notes (link symptoms to injury & job duties)

Detailed Functional Capacity Assessment

Rate each area: 0 = Unable, 5 = Significant difficulty, 10 = Normal/pre-injury. Track changes weekly — improvement or decline both matter.

Function	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Sitting tolerance							
Standing tolerance							
Walking distance							
Lifting capacity							
Bending/stooping							
Reaching/over head							
Gripping/hand use							
Stair climbing							
Driving							
Concentration/focus							

Daily Living & Self-Care Impact

Check: ' = Independent, ~ = Needed help / modified, ' = Unable. These document total d

Activity	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Bathing / showering							
Dressing							
Preparing meals							
Housework / cleaning							
Grocery shopping							
Childcare duties							
Sleep quality (1-5)							

Mobility Aids / Assistive Devices Used

Medical Appointments & Treatment

WCB weighs treatment compliance heavily. Record every appointment, recommendation, and outcome so the file shows effort as well as injury.

Date	Provider / Clinic	Type (MD/Physio/Specialist)	Treatment Provided	Pain Before (0-10)	Pain After (0-10)	Next Steps / Prescribed

Medication Log

Record all medications: prescribed, OTC, and topical. Track effectiveness and side effects for your doctor and WCB medical advisor.

Date	Medication Name	Dose	Time Taken	Relief % (0-100)	Duration of Relief	Side Effects

Home Exercise / Rehabilitation Compliance

Track prescribed home exercises. Completion is not just rehab detail here. It becomes part of the claim narrative.

Date	Exercise 1: _____	Exercise 2: _____	Exercise 3: _____	Duration (min)	Pain During (0-10)	Completed All? (Y/N)

Date	Exercise 1: _____	Exercise 2: _____	Exercise 3: _____	Duration (min)	Pain During (0-10)	Completed All? (Y/N)

Weekly Work Impact Summary

Complete at week end. This page exists to make the gap between your capacity and the job demands impossible to wave away.

Week of: _____

Work Days Attended (full duties): _____

Work Days Attended (modified duties): _____

Work Days Missed (injury-related): _____

Hours Worked This Week: _____

Normal Hours for This Position: _____

Modified Duties Required:

1. _____
2. _____
3. _____
4. _____

Accommodations Provided by Employer:

1. _____
2. _____
3. _____

Specific Work Tasks I Could Not Complete This Week

Return-to-Work Progress / Barriers

Supervisor / Case Manager Notes

Monthly Summary — For WCB Case Manager Review

Complete at month end. This is the compressed version a case manager or medical advisor can scan fast without losing the pressure you were actually under.

Month / Year: _____

WCB Claim Number: _____

Work Impact This Month

Total Work Days Missed: _____

Days on Modified Duties: _____

Days at Full Duties: _____

Pain Summary

Average Pain Level (0-10): _____

Worst Pain Level This Month: _____

Best Pain Level This Month: _____

Pain Trend (improving / stable / worsening): _____

Treatment Compliance

MD Appointments Attended / Scheduled: _____

Physio Sessions Attended / Scheduled: _____

Home Exercise Compliance (%): _____

Functional Capacity Changes

Improved: _____

Unchanged: _____

Worsened: _____
