

Fibromyalgia Pain Diary

A fibro-specific record for widespread pain, fatigue, fog, flare spread, and the pattern they form together.

Routing Note
Need: Fibromyalgia does not arrive as one clean symptom. It arrives as a field of interference. This sheet respects that.
Tool: Use it to track widespread pain, fatigue, brain fog, poor sleep, and flare spread without pretending they belong in separate boxes.
Rule: Diffuse is not vague. The pattern is still real even when the borders move.
