

Neuropathy Symptom Tracker

A neuropathy map for numbness, tingling, weakness, balance change, and progression over time.

Routing Note

Need: Neuropathy is often a map before it is a conclusion. This sheet helps you track where it is, how it spreads, and what function it steals.

Tool: Use it when numbness, tingling, weakness, balance change, or progression across regions is the thing you need to prove.

Rule: Distribution matters. Symmetry matters. Progression matters.

Name: _____

Date Range: _____

Pain Scale Reference (0–10 NRS)

Daily Neuropathy Map

Rate symptoms 0–10 or mark present ('). The point is to catch progression, spread, and

Date	Numbness (0-10)	Tingling (0-10)	Burning (0-10)	Shooting Pain	Weakness	Balance	Sleep

Spread and Progression

Track where the neuropathy has reached. Use: M=Mild, Mod=Moderate, S=Severe. Distribution is part of the evidence.

Date	Feet	Lower Legs	Hands	Forearms	Other	Symmetrical?

Date	Feet	Lower Legs	Hands	Forearms	Other	Symmetrical?

Trigger, blood sugar, and medication notes
