

Symptom Tracking Before Diagnosis

A pattern-hunt tracker for the stage before diagnosis, when the evidence has to exist before the explanation does.

Routing Note

- Need:** Before diagnosis, the record often has to exist before the explanation does. This sheet is built for that stage.
- Tool:** Use it when symptoms cross systems, certainty is low, and you still need a structure strong enough to carry the evidence forward.
- Rule:** Do not sand the story down into something cleaner than the body is giving you.

Name: _____

Date Range: _____

Comprehensive Symptom Log

When seeking a diagnosis, capture everything. Patterns in diverse symptoms often point to the underlying condition.

Date	Primary Symptom	Severity	Secondary Symptoms	Timing	Triggers	Duration

Systemic Symptom Check

Check weekly. Many conditions affect multiple systems. Tracking all symptoms helps with differential diagnosis.

System	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Musculoskeletal							
Neurological							
GI / Digestive							
Fatigue / Energy							
Skin changes							
Fever / Chills							

System	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Cognitive (brain fog)							
Mood / Emotional							
Sleep disruption							
Other							

Tests & Appointments

Date	Doctor / Specialist	Tests Ordered	Results	Next Steps

Observations & Patterns Noticed
